## **INCLINED CONVEYORS**

Belt conveyor system can transport materials in bulk and bagged, such as stone, sand, coal, concrete, cement, gravel, fertilizer, mineral ore, limestone, coke, sawdust, wood chip, bulk material, grain, corn flakes, carbon black, etc.

It is very typical for part of a supply chain process to include transporting materials and other products between different equipment. However, if your process includes physical or manual transportation between weighing and bagging machines, there's a good chance you are losing out on time and money.

Union Special Medway provides machines that can significantly increase the efficiency of an operation, allowing businesses to save money on labor and operational costs. Our stainless steel cleated incline belt conveyor is a reliable way to transport your products throughout different stations of the production process. Built to last, our machines deliver products to their end destination safely and without cross contamination.

### **Incline Conveyor Production Efficiency**

Our stainless steel( optional ) cleated incline belt conveyor increases your production capabilities and daily output capacity while reducing the amount of time and manpower needed to carry out the job. These conveyors also add a high level of efficiency into your workflow. With the conveyors operating in conjunction with your entire packaging equipment supply chain system, your customer base can have confidence in your ability to deliver final product on time, every time.

- Receives product and delivers it to the weigher
- Stainless steel sanitary construction
- Heavy-duty, food grade plastic belt
- Custom designs available

### **Customization for Your Application**

We have the ability to customize the designs of our incline conveyor system in order to meet the requirements of your particular application. In addition, you can count on a sanitary environment for the transport of food product due to sanitary stainless steel construction and a food grade plastic belt.
